Multi-armed bandits is a rich, multi-disciplinary area that has been studied since 1933, with a surge of activity in the past 10-15 years. This is the first book to provide a textbook like treatment of the subject.

Sharing accurate and timely supply and demand information throughout a supply chain can yield significant performance improvements to all members of the supply chain. Despite the benefits, many firms are reluctant to share information with their supply chain partners due to an unequal distribution of risks, costs, and benefits among the partners. Thus, incentive mechanisms must be in place to induce communication, cooperation, and collaboration among all members of a supply chain. The issue of Information exchange/sharing has been examined by various researchers over the last 15-20 years. However, there is no research book that compiles various approaches, analyses, key implications, as well as future development of this area. This book will serve as a handbook for researchers who are interested in learning the state of the art of the line of research in this area and explore open research topics in this area. Contributors, all leading researchers, have committed to delivering 18 chapters, broken into four distinct sections covering the Value of Information Sharing, Contracting and Information, Information Signaling, and Incentives for Information Sharing.

Using this detailed, fully updated second edition, you'll find all of the information you need to successfully and effectively integrate and use the Cross Application Time Sheet with the key SAP ERP 6.0 components. This new edition includes information on SAP ERP 6.0 components including accounting, HR, Plant Maintenance, and Material Management. It also teaches you about recent changes in SAP ERP 6.0, including the new feature CATEX and how to use it to determine which data requires approval, the new workflow tasks, and the use of Web Dynpro to create data entry profiles for ESS as well as approving the time entries. This is the resource you need to use CATS effectively with all of your SAP ERP components. 1. CATS Overview Learn what CATS is and how you can derive maximum value by integrating it with other SAP components, including Human Capital Management (HCM), Plant Maintenance (PM), Materials Management (MM), and ERP Financials. 2. Feature CATEX Learn how to use the new feature CATEX to determine which data requires approval. 3. Reporting for CATS Find out about the standard programs used to manage the time sheet before, during, and after time collection. 4. Web Dynpros Understand the new web-enabled screens used to create data entry profiles, and learn how best to use them. 5. Processes and Transactions Overview Find lists of useful transactions, CATS structures and tables, CATS fields, and a CATS configuration assistant in the Resource Guide.
