Traditionally, brands have been created by agencies, and brand management has been undervalued. Fortunately, that mindset is now shifting, and we are pleased to have been part of the effort to build awareness about the value of brands. Our goal for Future-Proof Your Brand is to help you deliver and manage brand change. From our twenty-five-plus years of experience, we have found that smart integration of data-driven insights, mission-critical logistics, and predictive analytics for future change make that delivery possible and successful. We developed a proprietary process that has achieved results for 1200-plus organisations around the globe. Some of those include SkyTeam, Deutsche Telekom, Merck, Airbus Group, and ING Group. Our straightforward process facilitates decisions that impact your employees, customers, and prospects. The top concerns of your board and C-suite are usually questions about costs, timing, and ROI. We address these concerns to help you move forward with confidence. This book is a collection of our methods for solving brand implementation and management challenges. It covers the essentials and more. We tried to make the concepts, tools, and recommended steps specific and digestible. Do we confuse globalization for Americanization? What are the distinctive elements in the interplay of the local and the global? This book examines globalization from the perspective of both the West and the East. It considers globalization as a general social and economic process, and the challenges it presents for Western social science. The meaning of a global perspective is explored through various concrete examples: religion, migration, medicine, terrorism, global disasters, citizenship, multiculturalism, media and popular culture. Introduced with a foreword from Roland Robertson, the book is brimming with novel interpretations and fresh insights that will contribute to illuminating the practical realities of globalization.

Another advantage is that students at different playing and reading levels can make music together. The score contains a chart that lists the level of difficulty of each piece and each part so that the

to achieve objectives that we are not really passionate about. Because of the advancement of consumer electronic technology, we are surrounded by distractions that are constantly craving engagement. The engagement we give these distractions is taking away our ability to focus on the things that really matter. If we could just spend less time tapping our smart phones, we could do a whole lot more with our waking hours. Indulging in these distractions also promotes the practice of constantly switching attentions. This habit kills our ability to focus. People who have this kind of habit often become uncomfortable when doing one thing for a long period of time. They lack the ability to continue working, especially if the task is very boring. Luckily, there are ways to rehabilitate our ability to focus. We can enhance our minds and condition them to be ready for tasks that require prolonged attention. However, we need to develop habits and practice some exercises to be able to accomplish this. This book provides you with these habits and the exercises. They will help you develop a mind capable to concentrating for longer periods of time. There is no ultimate technique that will work for everyone. That is why we provide you with 25 techniques. If the first tip will not work for you, you still have 24 chances to improve your focus.

"If good design tells the truth," writes Robert Grudin in this path-breaking book

on esthetics and authority, “poor design tells a lie, a lie usually related . . . to the getting or abusing of power.” From the ornate cathedrals of Renaissance Europe to the much-maligned Ford Edsel of the late 1950s, all products of human design communicate much more than their mere intended functions. Design holds both psychological and moral power over us, and these forces may be manipulated, however subtly, to surprising effect. In an argument that touches upon subjects as seemingly unrelated as the Japanese tea ceremony, Italian mannerist painting, and Thomas Jefferson’s Monticello plantation, Grudin turns his attention to the role of design in our daily lives, focusing especially on how political and economic powers impress themselves on us through the built environment. Although architects and designers will find valuable insights here, Grudin’s intended audience is not exclusively the trained expert but all those who use designs and live within them every day.

In November 1939, the Nazis used the so-called Venlo Incident as a pretext for invading the Netherlands. Following orders from Himmler, two British intelligence officers, Sigismund Payne Best and Richard Stevens, were captured from the Café Backus in the town of Venlo. Best had been trying to contact German officers plotting against Hitler. The Netherlands had been an ideal ground for operations, because of its proximity to Germany and the fact that Dutch

Intelligence was badly funded. When Best met the three agents – including Walter Schellenberg – he was carrying with him a list of British agents who were working in Europe. When he arrived at the café, which was just over the Dutch border, he realised he had walked into a trap. A Dutch intelligence officer who accompanied them, Dirk Klop, was fatally wounded. Best and Stevens were taken into Germany. After their Berlin interrogation and torture they were taken to the notorious Sachsenhausen concentration camp. Hitler used the incident – together with the Elser bomb plot – as an excuse for war with the Netherlands, claiming their involvement with Britain violated their neutrality. As Nigel Jones explains, the incident was crucial in making the British suspicious of dealings with anti-Hitler resistance.

community discusses the five years following the Lehman Brothers demise (as a metaphor for the ongoing financial crises). We try to understand the complexities of the financial crises for future research and lecturing. Do the crises challenge common wisdom? Can long-standing theoretical models stand the test of ongoing turbulences in markets and financial institutions? Are relationships between governments, markets and regulation in dire need of redefinition? What are explanations and remedies for the crises? In short: what's new? Four themes are discussed that could spark theoretical innovations. We offer governments, regulators, financial institutions, shareholders, companies, and clients suggestions, tools, and mentalities to address the crises. The themes are: The blame game Psychology and culture Reinventing regulation and overcoming information asymmetry Other business models, new values

This study focuses on a rapidly developing, but still highly controversial, area of EU law: the emergence of general principles with constitutional relevance for EU civil law guiding its interpretation, gap filling, and legality control. The book brings to light seven principles in the case law of the Court of Justice of the European Union and in the Charter of Fundamental Rights. Principles 1, 2, and 3 on framed autonomy, protection of the weaker party, and non-discrimination are now part of substantive EU law, mainly contract law. Principle 4 on effectiveness, together

with the principle of equivalence, is an "old acquaintance" of EU law and has mostly to do with procedures, but can also be extended to cover substantive and remedial matters. Principles 5 and 6 on balancing and proportionality are primarily concerned with methodological questions: the first has to do with judicial interpretation and application of EU civil law, the second with legal-political questions on the future of a (questionable) codified or optional EU civil law, in particular sales law. Finally, Principle 7 on good faith is still an emerging principle, but is gradually gaining importance. This book will allow the reader to understand and to assess the current evolution of EU civil law, in days where its autonomous character is increasingly recognized in the case law of the Court, and where the Charter is having a growing impact on its constitutional foundations.
