While the Reformed tradition originated with Huldrych Zwingli and was more fully developed with John Calvin, it was John Knox who made significant contributions to this movement as it unfolded in Scotland. *John Knox: An Introduction to His Life and Works* traces the life and thought of John Knox in a succinct and readable way. While a number of biographies tell the story of the famous Scottish reformer, professors Kyle and Johnson take the reader in a different direction, offering an interpretation of his writings. They take a chronological approach to his works--leading the reader through his early years, his exile, and his return to Scotland--allowing them to speak for themselves, an approach that also tells the story of Knox's life and ideas.

In the CliffsComplete guides, the novel's complete text and a glossary appear side-by-side with coordinating numbered lines to help you understand unusual words and phrasing. You'll also find all the commentary and resources of a standard CliffsNotes for Literature. CliffsComplete *Othello* makes you familiar with one of the most staged of all of Shakespeare's plays. *Othello* is a tale of love and betrayal, secrets, passion, and intrigue. Psychology and wit pit strength and virtue against jealousy and evil agendas. The results leave no winners, only tragedy in the lives of the jealous Moor, *Othello*, and his wife, *Desdemona*. Enhance your reading of *Othello* and save valuable studying time — all at once — with CliffsComplete *Othello*. Additional features include: A summary and insightful commentary for each scene Bibliography and historical background on the playwright, William Shakespeare A look at the historical context and structure of the play Discussions on the play's symbols and themes A character map that graphically illustrates the relationships among the characters Review questions, a quiz, discussion topics (essay questions), activity ideas A Resource Center full of books, articles, films, and Internet sites Streamline your literature study with all-in-one help from CliffsComplete guides!

The main objectives of this introductory physics book are twofold: to provide the student with a clear and logical presentation of the basic concepts and principles of physics, and to strengthen an understanding of the concepts and principles through a broad range of interesting applications to the real world. In order to meet these objectives, emphasis is placed on sound physical arguments and discussions of everyday experiences and observations. At the same time, we motivate the student through practical examples that demonstrate the role of physics in other disciplines. The sixth edition features new pedagogy in keeping

with the findings in physics education research. The rich new pedagogy has been integrated within the framework of an established and reliable text, facilitating its use by instructors. The full COLLEGE PHYSICS text, which covers the standard topics in classical physics and 20th century physics, is divided into six parts. COLLEGE PHYSICS, VOLUME 2 covers three of those six parts, including electricity and magnetism (Part IV); properties of light and the field of geometric and wave optics (Part V); and an introduction to special relativity, quantum physics, and atomic and nuclear physics (Part VI).

Kerry James Marshall is one of America's greatest living painters. History of Painting presents a groundbreaking body of new work that engages with the history of the medium itself. In History of Painting, the artist has widened his scope to include both figurative and nonfigurative works that deal explicitly with art history, race, and gender, as well as force us to reexamine how artworks are received in the world and in the art market. In the paintings in this book, Marshall's critique of history and of dominant white narratives is present, even as the subjects of the paintings move between reproductions of auction catalogues, abstract works, and scenes of everyday life. Essays by Teju Cole and Hal Foster help readers navigate the artist's masterful vision, decoding complexly layered works such as Untitled (Underpainting) (2018) and Marshall's own artistic philosophy. This catalogue is published on the occasion of Marshall's eponymous exhibition at David Zwirner, London, in 2018.
