Resource added for the Paralegal program 101101.

As interactive application software such as apps, installations, and multimedia presentations have become pervasive in everyday life, more and more computer scientists, engineers, and technology experts acknowledge the influence that exists beyond visual explanations. Computational Solutions for Knowledge, Art, and Entertainment: Information Exchange Beyond Text focuses on the methods of depicting knowledge-based concepts in order to assert power beyond a visual explanation of scientific and computational notions. This book combines formal descriptions with graphical presentations and encourages readers to interact by creating visual solutions for science-related concepts and presenting data. This reference is essential for researchers, computer scientists, and academics focusing on the integration of science, technology, computing, art, and mathematics for visual problem solving.

Cass Sunstein and Martha Nussbaum bring together an all-star cast of contributors to explore the legal and political issues that underlie the campaign for animal rights and the opposition to it. Addressing ethical questions about ownership, protection against unjustified suffering, and the ability of animals to make their own choices free from human control, the authors offer numerous different perspectives on animal rights and animal welfare. They show that whatever one's ultimate conclusions, the relationship between human beings and nonhuman animals is being fundamentally rethought. This book offers a state-of-the-art treatment of that rethinking.

In this landmark work of animal rights activism, Carol J. Adams - the bestselling author of *The Sexual Politics of Meat* - explores the intersections and common causes of feminism and the defense of animals. *Neither Man Nor Beast* explores the common link between cultural attitudes to women and animals in modern Western culture that have enabled the systematic exploitation of both. A vivid work that takes in environmental ethics, theological perspectives and feminist theory, the Bloomsbury Revelations edition includes a new foreword by the author and new images illustrating the continuing relevance of the book today.

This guide contains four books-worth of creative activities for the early years in one bumper-value guide. Perfect to dip into, this gem of a guide features: - Hundreds of easy-to-follow activities that cover 40 of the most popular early years topics - Each topic contains ideas for singing, dance, movement, storytelling, art and design, and drama - An easy-reference key showing which of the Creative Development Early Learning Goals are being explored An essential for anyone wanting new and creative ideas for use in topic work with the early years. The Targeting Maths for Victoria scheme is VELs compliant. It has been written for CSF II and provides complete coverage of the course with student books that are clear, fun and easy to use.

Drawing on a range of perspectives -philosophy, literary criticism, art history and cultural studies-the essays collected here explore unconventional ways of knowing animals, offering new insights into apparently familiar relationships between humans and other living beings.

Three mice make a variety of things out of different shapes as they hide from a scary cat.

What animals live on the farm? Just follow the numbered dots and see. There are more than 35 pictures to complete. Some feature familiar and friendly creatures, including chickens, cows, donkeys, geese, horses, pigs, rabbits, and sheep. Other dot-to-dots showcase more unusual animals: Did you know that there are farms that raise llamas and reindeer—or even bats and bees? Children will have lots of fun as they learn whether each creature is wild or domesticated, what its job on the farm is, what it eats, how farmers care for it, and much more.
