This volume is a collection of papers that highlights some recurring themes that have surfaced in the generative tradition in linguistics over the past 40 years. The volume is more than a historical take on a theoretical tradition; rather, it is also a "compass" pointing to exciting new empirical directions inspired by generative theory. In fact, the papers show a progression from core theoretical concerns to data-driven experimental investigation and can be divided roughly into two categories: those that follow a syntactic and theoretical course, and those that follow an experimental or applied path. Many of the papers revisit long-standing or recurring themes in the generative tradition, some of which seek experimental validation or refutation. The merger of theoretical and experimental concerns makes this volume stand out, but it is also forward looking in that it addresses the recent concerns of the creation and consumption of data across the discipline.

This business classic features straight-talking advice you’ll never hear in school. Featuring a new foreword by Ariel Emanuel and Patrick Whitesell Mark H. McCormack, one of the most successful entrepreneurs in American business, is widely credited as the founder of the modern-day sports marketing industry. On a handshake with Arnold Palmer and less than a thousand dollars, he started International Management Group and, over a four-decade period, built the company into a multimillion-dollar enterprise with offices in more than forty countries. To this day, McCormack’s business classic remains a must-read for executives and managers at every level. Relating his proven method of “applied people sense” in key chapters on sales, negotiation, reading others and yourself, and executive time management, McCormack presents powerful real-world guidance on • the secret life of a deal • management philosophies that don’t work (and one that does) • the key to running a meeting—and how to attend one • the positive use of negative reinforcement • proven ways to observe aggressively and take the edge • and much more Praise for What They Don’t Teach You at Harvard Business School “Incisive, intelligent, and witty, What They Don’t Teach You at Harvard Business School is a sure winner—like the author himself. Reading it has taught me a lot.”—Rupert Murdoch,

executive chairman, News Corp, chairman and CEO, 21st Century Fox “Clear, concise, and informative . . . Like a good mentor, this book will be a valuable aid throughout your business career.”—Herbert J. Siegel, chairman, Chris-Craft Industries, Inc. “Mark McCormack describes the approach I have personally seen him adopt, which has not only contributed to the growth of his business, but mine as well.”—Arnold Palmer “There have been what we love to call dynasties in every sport. IMG has been different. What this one brilliant man, Mark McCormack, created is the only dynasty ever over all sport.”—Frank Deford, senior contributing writer, Sports Illustrated

Today's headlines report cities going bankrupt, states running large deficits, and nations stuck in high debt and stagnation. Philip Kotler, Donald Haider, and Irving Rein argue that thousands of "places" -- cities, states, and nations -- are in crisis, and can no longer rely on national industrial policies, such as federal matching funds, as a promise of jobs and protection. When trouble strikes, places resort to various palliatives such as chasing grants from state or federal sources, bidding for smokestack industries, or building convention centers and exotic attractions. The authors show instead that places must, like any market-driven business, become attractive "products" by improving their industrial base and communicating their special qualities more effectively to their target markets. From studies of cities and nations throughout the world, Kotler, Haider, and Rein offer a systematic analysis of why so many places have fallen on hard times, and make recommendations on what can be done to revitalize a place's economy. They show how "place wars" -- battles for Japanese factories, government projects, Olympic Games, baseball team franchises, convention business, and other economic prizes -- are often misguided and end in wasted money and effort. The hidden key to vigorous economic development, the authors argue, is strategic marketing of places by rebuilding infrastructure, creating a skilled labor force, stimulating local business entrepreneurship and expansion, developing strong public/private partnerships, identifying and attracting "place compatible" companies and industries, creating distinctive local attractions, building a service-friendly culture, and promoting these advantages effectively. Strategic marketing of places requires a deep understanding of how "place buyers" -- tourists, new residents, factories, corporate headquarters, investors -- make their place decisions. With this understanding, "place sellers" -- economic development agencies, tourist promotion agencies, mayor's offices -- can take the necessary steps to compete aggressively for place buyers. This straightforward guide for effectively marketing places will be the framework for economic development in the 1990s and beyond.

A thorough update to a best-selling text emphasizing how marketing solves a wide range of health care problems. There has been an unmet need for a health care marketing text that focuses on solving real-world health care problems. The all new second edition of Strategic Marketing for Health Care Organizations meets this need by using an innovative approach supported by the authors' deep academic, health management, and medical experience. Kotler, Stevens, and Shalowitz begin by establishing a foundation of marketing management principles. A stepwise approach is used to guide readers through the application of these marketing concepts to a physician marketing plan. The value of using environmental analysis to detect health care market opportunities and threats then follows. Readers are shown how secondary and primary marketing research is used to analyze environmental forces affecting a wide range of health care market participants. The heart of the book demonstrates how health management problems are solved using marketing tools and the latest available market data and information. Since the health care market is broad, heterogenous, and interconnected, it is important to have a comprehensive perspective. Individual chapters cover marketing for consumers, physicians, hospitals, health tech companies, biopharma companies, and social cause marketing – with strategies in this last chapter very relevant to the Covid-19 pandemic. Each chapter gives readers the opportunity to improve marketing problem-solving skills through discussion questions, case studies, and exercises.
