Selected by The New York Times Book Review as a Notable Book of the Year A revelatory tale of science, adventure, and modern myth. When the writer Donovan Hohn heard of the mysterious loss of thousands of bath toys at sea, he figured he would interview a few oceanographers, talk to a few beachcombers, and read up on Arctic science and geography. But questions can be like ocean currents: wade in too far, and they carry you away. Hohn's accidental odyssey pulls him into the secretive world of shipping conglomerates, the daring work of Arctic researchers, the lunatic risks of maverick sailors, and the shadowy world of Chinese toy factories. Moby-Duck is a journey into the heart of the sea and an adventure through science, myth, the global economy, and some of the worst weather imaginable. With each new discovery, Hohn learns of another loose thread, and with each successive chase, he comes closer to understanding where his castaway quarry comes from and where it goes. In the grand tradition of Tony Horwitz and David Quammen, Moby-Duck is a compulsively

Who knew making dinner could change your life? Louisa Copeland certainly

didn't. But when the George Foreman grill falls out of the pantry onto her head, resulting in a bump and a mighty case of amnesia, Louisa's life takes a turn for the unexpected. Who is this Collin fellow, claiming she is his wife? And whose kids are those? Her name can't be Louisa. Why, she is the renowned romance writer Jazz Sweet, not a Midwestern mom of three. Struggling to put the pieces together of the life she's told she had, Louisa/Jazz may realize that some memories are better left alone.

Seven ducklings take a rhyming look at addition as they play games, chase bumblebees, and make noise.

Will a dream job offer win Natalie's heart, or does it belong to Shay and the twins?

Funny, thought-provoking, and incredibly disturbing, *Slow Death by Rubber Duck* reveals that just the living of daily life creates a chemical soup inside each of us. Pollution is no longer just about belching smokestacks and ugly sewer pipes - now, it's personal. The most dangerous pollution has always come from commonplace items in our homes and workplaces. Smith and Lourie ingested and inhaled a host of things that surround all of us all the time. This book exposes the extent to which we are poisoned every day of our lives. For this book, over the

period of a week - the kind of week that would be familiar to most people - the authors use their own bodies as the reference point and tell the story of pollution in our modern world, the miscreant corporate giants who manufacture the toxins, the weak-kneed government officials who let it happen, and the effects on people and families across the globe. Parents and concerned citizens will have to read this book. Key concerns raised in *Slow Death by Rubber Duck*: • Flame-retardant chemicals from electronics and household dust polluting our blood. • Toxins in our urine caused by leaching from plastics and run-of-the-mill shampoos, toothpastes and deodorant. • Mercury in our blood from eating tuna. • The chemicals that build up in our body when carpets and upholstery off-gas. Ultimately hopeful, the book empowers readers with some simple ideas for protecting themselves and their families, and changing things for the better.

Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of Into the Wild. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw

the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.
