K. Eric Drexler is the founding father of nanotechnology—the science of engineering on a molecular level. In Radical Abundance, he shows how rapid scientific progress is about to change our world. Thanks to atomically precise manufacturing, we will soon have the power to produce radically more of what people want, and at a lower cost. The result will shake the very foundations of our economy and environment. Already, scientists have constructed prototypes for circuit boards built of millions of precisely arranged atoms. The advent of this kind of atomic precision promises to change the way we make things—cleanly, inexpensively, and on a global scale. It allows us to imagine a world where solar arrays cost no more than cardboard and aluminum foil, and laptops cost about the same. A provocative tour of cutting edge science and its implications by the field's founder and master, Radical Abundance offers a mind-expanding vision of a world hurtling toward an unexpected future.

During the tour you can see symbolic drawings carved in stones; those were created by masters in the 13th century. Next to the old mosque there is a cemetery, which also has great historical value. Its territory features the tomb of Sultan Abu Al Barakat and other rulers famous for their great deeds. However, the biggest religious building is Old Friday Mosque. It's a large architectural complex including Islamic center and the mosque itself with luxurious golden domes. The mosque can accommodate 5,000 worshipers at the same time. Old Friday Mosque is the most sacred place for locals, so it is a must see place

From Hugo Award-winning debut author Suzanne Palmer comes an action-packed sci-fi caper starring Fergus Ferguson, interstellar repo man and professional finder Fergus Ferguson has been called a lot of names: thief, con artist, repo man. He prefers the term finder. His latest job should be simple. Find the spacecraft Venetia's Sword and steal it back from Arum Gilger, ex-nobleman turned power-hungry trade boss. He'll slip in, decode the ship's compromised AI security, and get out of town, Sword in hand. Fergus locates both Gilger and the ship in the farthest corner of human-inhabited space, a backwater deep space colony called Cernee. But Fergus' arrival at the colony is anything but simple. A cable car explosion launches Cernee into civil war, and Fergus must ally with Gilger's enemies to navigate a field of space mines and a small army of hostile mercenaries. What was supposed to be a routine job evolves into negotiating a power struggle between factions. Even worse, Fergus has become increasingly—and inconveniently—invested in the lives of the locals. It doesn't help that a dangerous alien species Fergus thought mythical prove unsettlingly real, and their ominous triangle ships keep following him around. Foolhardy. Eccentric. Reckless. Whatever he's called, Fergus will need all the help he can get to take back the Sword and maybe save Cernee from destruction in the process.

In an unnamed Third World country, in the not-so-distant future, three “dumpsite boys” make a living picking through the mountains of garbage on the outskirts of a large city. One unlucky-lucky day, Raphael finds something very special and very mysterious. So mysterious that he decides to keep it, even when the city police offer a handsome reward for its return. That decision brings with it terrifying consequences, and soon the dumpsite boys must use all of their cunning and courage to stay ahead of their pursuers. It's up to Raphael, Gardo, and Rat—boys who have no education, no parents, no homes, and no money—to solve the mystery and right a terrible wrong. Andy Mulligan has written a powerful story about unthinkable poverty—and the kind of hope and determination that can transcend it. With twists and turns, unrelenting action, and deep, raw emotion, Trash is a heart-pounding, breath-holding novel.

Covers all sedans including XR6 and XR8, station wagon, utility, cab chassis and Fairlane - LTD. Includes LPG and turbo engines. Paul Durham keeps making Copies of himself: software simulations of his own brain and body which can be run in virtual reality, albeit seventeen times more slowly than real time. He wants them to be his guinea pigs for a set of experiments about the nature of artificial intelligence, time, and causality, but they keep changing their mind and baling out on him, shutting themselves down. Maria Deluca is an Autoverse addict; she's unemployed and running out of money, but she can't stop wasting her time playing around with the cellular automaton known as the Autoverse, a virtual world that follows a simple set of mathematical rules as its “laws of physics”. Paul makes Maria a very strange offer: he asks her to design a seed for an entire virtual biosphere able to exist inside the Autoverse, modelled right down to the molecular level. The job will pay well, and will allow her to indulge her obsession. There has to be a catch, though, because such a seed would be useless without a simulation of the Autoverse large enough to allow the resulting biosphere to grow and flourish — a feat far beyond the capacity of all the computers in the world.

Hitler's Forgotten Children is both a harrowing personal memoir and a devastating investigation into the awful crimes and monstrous scope of the Lebensborn program in World War 2. Created by Heinrich Himmler, the Lebensborn program abducted as many as half a million children from across Europe. Through a process called Germanization, they were to become the next generation of the Aryan master race in the second phase of the Final Solution. In the summer of 1942, parents across Nazi-occupied Yugoslavia were required to submit their children to medical checks designed to assess racial purity. One such child, Erika Matko, was nine months old when Nazi doctors declared her fit to be a "Child of Hitler." Taken to Germany and placed with politically vetted foster parents, Erika was renamed Ingrid von Oelhafen. Many years later, Ingrid began to uncover the truth of her identity. Though the Nazis destroyed many Lebensborn records, Ingrid unearthed rare documents, including Nuremberg trial testimony about her own abduction. Following the evidence back to her place of birth, Ingrid discovered an even more shocking secret: a woman named Erika Matko, who as an infant had been given to Ingrid's mother as a replacement child. **INCLUDES PHOTOGRAPHS**
