

The Doctor Who Cures Cancer

A woman discovers the source of cancer is bacterial, rather than viral, and spends years in the mid-1900s researching a protocol to successfully destroy it. But the medical establishment vilifies and ignores her findings. So she goes it alone, establishing her own medical clinic that has phenomenal survival rates. Sounds like a Michael Crichton techno-thriller? No way! It's the real-life story of Virginia Livingston-Wheeler, M.D., a brilliant, stubborn, pioneering microbiologist and epidemiologist whose cure for cancer will one day be viewed alongside the discoveries of Pasteur, Curie, and Salk/Sabin. This story is more relevant today than ever before because the latest science is now validating her protocols. Antitubercular vaccines, autogenous vaccines (prepared from the patient's own tumor), high doses of vitamins A, C, D, E, and essential minerals, and an immune-boosting diet high in cancer-fighting foods like broccoli sprouts and tomatoes are recommended by the academy that once denounced her. That's what motivated author Edmond G. Addeo, who first wrote about the doctor in *The Conquest of Cancer* (Franklin-Watts, 1985), to revisit and update her story in this book. Addeo is convinced that laypeople- especially the millions diagnosed with new cancers each year- are anxiously searching for a real cure, while newly trained practitioners are bound to be more receptive to the innovative work of "Dr. Virginia," as he calls her. Much of the book recounts Addeo's original research into Dr. Virginia's scientific discoveries that led to successful treatment modalities- 80 to 90 percent cure rate in comparison with the standard rate of 15 to 20 percent. Three chapters deal with hard science: why Dr. Virginia rejected the three conventional cancer treatments of surgery, chemotherapy, and radiation; how the immune system works; and her discovery of the cancer microbe and development of a vaccine to destroy it. Another chapter surveys the many articles she published about the bacterial nature of cancer and subsequent record-breaking treatment of it. Throughout the book are news updates about current cancer treatments, research projects, and nutritional developments that confirm Dr. Virginia's visionary work- promoting the body's innate ability to combat cancer.

Draws on the expertise of eight doctors whose cutting-edge methods are enabling unprecedented cures, sharing the celebrity author's personal experiences as well as the survival stories of other cancer patients while identifying lifestyle strategies and challenging mainstream practices. By the best-selling author of *Ageless*.

A surprisingly open memoir co-authored by the married duo of a world class oncologist and a cancer survivor about love, pain, hope, strength and resilience while navigating the overwhelming breast cancer advocacy movement. *Off Our Chests* recounts the story of Liza and John's experience with her diagnosis and treatment. Written in alternating voices, Liza details her treatment, the complex decisions she had to make throughout her course of chemotherapy and radiation, including clinical trial participation and an elective double mastectomy, the added complexity of being treated at the cancer center of which John was the chief of hematology and oncology, and the emotional impact of knowing she may die as a young woman with young children. John, who lost his own mother to cancer at the age of 13, provides an inside look into the world of cancer care and research, but also the perspective of someone who understands the medicine but who was unprepared for assuming the role of caregiver and worried husband. John adds insights into his world of running the clinical operations of the cancer center where Liza would receive her care, commentary on the breast cancer machine, the need for clinical research, the high cost of cancer care, and an easy to understand explanation of the clinical and scientific background of oncology. While they both felt that they were already expert commentators on their own "Cancer Channel" during the course of Liza's illness, they both came to realize how little understanding they truly had of what a cancer diagnosis does to the patient, caregivers, children, family members, and friends. Liza and John share their most intimate thoughts, including many that were previously unsaid--even between the two of them. Both gain an understanding of the other's life, a deeper appreciation of what it means to be a cancer patient, and of the emotional strains of being an oncologist where so many of the patients die on their watch.

Fifteen years Cancer Free.... I had a CAT scan and went to the lung specialist office (in the same building). We waited an extra long time for the doctor to come into the consultation room. When he finally came in you could tell from his voice and his demeanor that he was agitated, perhaps frustrated. The first words out of his mouth in a loud and obviously stressed voice were, "Mr. Lawson, you had cancer and now it's gone and I don't know what happened!" I replied, "Would you like for me to tell you." His response floored me when he said, "I don't want to hear it!" I still haven't understood that comment after all of these years... If there were a way to help patients, without chemo, radiation or surgery, wouldn't you logically, as a doctor, want to know about it? In this book I share my journey to Health and Hope through the use of Herbs as well as many insights into the use of herbs. It is by no means "all inclusive," but will give you a place to start to come to terms with the use of Alternative Medicine. Perhaps it will give you hope again also.

In this comprehensive, practical approach to combating and preventing cancer, readers can assess their risks through a screening questionnaire, learn to change their internal environment to thwart cancer, and discover the science behind the emotions and attitudes that play a significant role in prevention and treatment. Divided into three sections-prevention, treatment, and coping with side effects of treatment-*How to Prevent and Treat Cancer with Natural Medicine* offers precise combinations of food, vitamins, herbs, minerals, and supplements; daily meal plans; and shopping lists, as well as specific recommendations for breast, prostate, lung, and colon cancer.

Dr. Sebi Cure For Herpes, Cancer and Medicinal Herbs Treatment - A Comprehensive Guide to Getting Healed from Herpes and Cancer Using Doctor Sebi Herbs, Food List and Alkaline Diet! Do you want to heal and revitalize your body with natural herbs? Have you always wanted to know more about Dr. Sebi's herbs and his unique approach to healing through natural alkaline diets? Then, you are welcome to read further... Alfredo Bowman, popularly known as Dr. Sebi, is a renowned holistic doctor who cured several terminal diseases with the use of herbs, spices, and a unique vegan diet that reverses all the diseases in the body. This vegan diet cleanses the mucus membrane. In doing so, the skin, blood, and lymphatic system get the boost they need to reverse the herpes and cancer diseases and every other illness in the body. He personally researched and identified herbs in North America, Central and South America, Africa, and the Caribbean, and established a unique methodology and approach to healing the human body using herbs that was confidently entrenched in his over 30 years of experience. Dr. Sebi who is a world-renowned herbalist, naturalist, and pathologist, had a silent exit from the world in 2016. Regardless of the fact that he is deceased, his discoveries and self-invented herpes and cancer cure are still helping millions of herpes and cancer patients around the world. Hence, he established a list of foods that he considered toxic to the body, which were processed and synthetic. They include fried food, sugar, iodized salt and alcohol (mostly the western diet). He argued that if we should substitute such toxic substances with natural food items like fruit, green vegetables, raw nuts and grains, we would be able to ignite our body's ability to heal itself. During his lifetime, Dr. Sebi healed many people with his method, and his demise has not changed that, he left behind holistic healing for herpes, HIV, diabetes, lupus, etc. You too can be inspired by his life and his viewpoint about several deadly diseases. With a goal to eradicate cancer and herpes simplex virus from the surface of the earth using his natural medicinal herbs, here is an insight into what Dr. Sebi's cure for these diseases is all about. When it comes to disease, who beats the odds — and why? When it comes to spontaneous healing, skepticism abounds. Doctors are taught that “miraculous” recoveries are flukes, and as a result they don't study those cases or take them into account when treating patients. Enter Dr. Jeff Rediger, who has spent over 15 years studying spontaneous healing, pioneering the use of scientific tools to investigate

recoveries from incurable illnesses. Dr. Rediger's research has taken him from America's top hospitals to healing centers around the world—and along the way he's uncovered insights into why some people beat the odds. In *Cured*, Dr. Rediger digs down to the root causes of illness, showing how to create an environment that sets the stage for healing. He reveals the patterns behind healing and lays out the physical and mental principles associated with recovery: first, we need to physically heal our diet and our immune systems. Next, we need to mentally heal our stress response and our identities. Through rigorous research, Dr. Rediger shows that much of our physical reality is created in our minds. Our perception changes our experience, even to the point of changing our physical bodies—and thus the healing of our identity may be our greatest tool to recovery. Ultimately, miracles only contradict what we know of nature at this point in time. *Cured* leads the way in explaining the science behind these miracles, and provides a first-of-its-kind guidebook to both healing and preventing disease.

"The inspiring memoir of a young doctor and former college athlete who became a champion for people suffering from rare, under-researched diseases--all while battling his own. A former Georgetown quarterback nicknamed "The Beast," David Fajgenbaum was also a force in medical school, where he was known for his unmatched mental stamina. But things changed dramatically when he began suffering from inexplicable fatigue. In a matter of weeks, his organs were failing and he was read his last rites. Doctors were baffled over a condition they had yet to even diagnose; floating in and out of consciousness, Fajgenbaum prayed for the equivalent of game day overtime: a second chance. Miraculously, Fajgenbaum survived, but only to endure repeated near-death relapses from what would eventually be identified as a form of Castleman disease--an extremely deadly and rare condition that acts like a cross between cancer and an autoimmune disease. When he relapsed on the only drug in development and realized that the medical community was unlikely to make progress in time to save his life, Fajgenbaum turned his desperate hope for a cure into concrete action: between hospitalizations he studied his own charts and tested his own blood samples, looking for clues that could unlock a new treatment. With the help of family, friends and mentors, he also reached out to other Castleman disease patients and physicians, and eventually came up with an ambitious plan to crowdsource the most promising research questions and recruit world-class researchers to tackle them; instead of waiting for the scientific stars to align, he proposed to align them himself. More than five years later and now married to his college sweetheart, his hard work has paid off: a treatment that he identified has induced a tentative remission and his novel approach to collaborative scientific inquiry has become a blueprint for advancing rare disease research. His incredible story demonstrates the potency of hope, and what can happen when forces of determination, love, family, faith and serendipity collide"--

The story of how two BRCA1+ sisters with the same 100% fatal cancer chose their destiny though opposite choices. The younger sister chose chemotherapy and died in 11 months from the chemo. The other sister used an unapproved and suppressed immunotherapy product that the FDA and MHRA banned from the USA and the UK that saved her life and she is currently the longest-known survivor of high-grade serous carcinoma of the ovaries and uterus with no chemotherapy. The struggles, fears, musings and discoveries of a woman determined not to die from a 100% fatal cancer WITHOUT chemotherapy and the oncologists who bullied, threatened and coerce terrified patients into allowing these so-called doctors to poison them with a "treatment" that has a 2.1% "cure" rate. She exposes the practice of oncology as nothing more than overpriced poison that enriches oncologists greatly while causing horrific suffering to 100% of the patients and MURDERS 50% of them before the cancer can kill them. The FDA is complicit in the ongoing mass murder of half a million people worldwide by suppressing REAL cures in favor of the million-dollar poison that is chemo. 80% of the income of EVERY oncologist (cancer "doctor") in America is FAILED chemotherapies, with massively marked up poisonous drugs and a big helping of lies to facilitate false hope in doomed cancer patients. Her story of hope and survival facing a "No Known Survivors" cancer while refusing chemotherapy is an inspirational story of the courage of her convictions while stripping bare the huge profits and pathetic cure rate of conventional chemotherapy. She is the longest known survivor of recurrent peritoneal carcinomatosis with no chemotherapy or radiation and now spends her time helping other cancer victims survive.

Discusses holistic approaches to treatment of cancers, including alternative treatment options, meditation, positive thinking, and nutrition.

For decades, scientists have puzzled over one of medicine's most confounding mysteries: Why doesn't our immune system recognize and fight cancer the way it does other diseases, like the common cold? As it turns out, the answer to that question can be traced to a series of tricks that cancer has developed to turn off normal immune responses-tricks that scientists have only recently discovered and learned to defeat. The result is what many are calling cancer's "penicillin moment," a revolutionary discovery in our understanding of cancer and how to beat it.

Journalist Charles Graeber expertly traces the fascinating history of immuno-oncology and guides readers through the revolutionary scientific research bringing cancer treatment into the 21st century. As advances in our understanding of cancer and the human immune system continue to fuel a therapeutic arms race among biotech and pharmaceutical companies around the world, the next step - harnessing the wealth of new information into modern and more effective patient therapies - is already well underway. Groundbreaking, riveting, and expertly told, *The Breakthrough* is the story of the game-changing scientific discoveries that unleash our natural ability to recognize and defeat cancer, as told through the experiences of the patients, physicians, and cancer immunotherapy researchers who are on the front lines. This is the incredible true story of the race to find a cure, a dispatch from the life-changing world of modern oncological science, and a brave new chapter in medical history.

Dr. Sebi was a Honduran man with a very humble beginning and was known and addressed as an herbalist, pathologist or a naturalist in different regions of the world; he left the biosphere in 2016. Indeed, it is true that he is no longer in our midst today, but his self-invented and established effective traditional therapy for diabetes, hypertension and organ cleansing is still helping millions of people with these conditions around the world. He created great strides in the world of natural health and wellness with the creation of his specialized diet. Dr. Sebi said that there were six fundamental food groups: live, raw, dead, hybrid, genetically modified, and drugs, but his diet basically cut out all the food groups except live and raw food, thereby encouraging dieters to eat as closely to a raw vegan diet as possible. These foods include foods like naturally grown fruits and vegetables, along with whole grains. He has believed that raw and live foods were "electric," which fought the acidic food waste in the body. So, with his approach to eating, Dr. Sebi established a list of foods that he deliberated to be the best for his diet. Sticking to Dr. Sebi's Diet and Food List to cure these diseases can be challenging if you eat out a lot. Consequently, you need to get used to making lots of meals at home. To help with this, this book is born so as to give you all of the information you need to eat right and the type of herbs to eat to live healthy.

Now in paperback: A thorough, cutting-edge, alternative therapy-focused exploration of Integrative Oncology care. With approximately 40 percent of men and women in the United States being diagnosed with cancer at some point in their lifetime, very few of us escape having cancer touch our lives in some way--whether it is our own life or that of a loved one. Scientific research continues to prove the benefits of nutritional and holistic therapies, yet, for the most part, these approaches to treatment still remain unexplored by the conventional medical establishment. With integrative and holistic healing being sought after and supported by more and more of the general public and medical community for various elements of everyday life, it only makes logical sense to explore these therapies with regard to one of the most prevalent causes of death of our time. In *Outside the Box Cancer Therapies*, naturopathic medical doctors Mark Stengler and Paul Anderson combine their expertise to focus on the most critical components of integrative oncology care. Supported by extensive research and decades of clinical experience, Dr. Stengler and Dr. Anderson thoroughly explain: • the different types of cancer and their causes • how proper nutrition can help to prevent and treat cancer • the most well-studied supplements to use with cancer treatment • cutting-edge naturopathic therapies, and • natural solutions to common problems, such as the side effects of chemotherapy and radiation. With a clear and focused approach, Dr. Stengler and Dr. Anderson provide a definitive and comprehensive resource for anyone seeking to heal from cancer or a professional looking for the most cutting, up-to-date integrative approaches to treatment.

"[Connie Strasheim] conducted intensive interviews with fifteen highly regarded doctors who specialize in cancer treatment, asking them thoughtful, important questions, and then spent months compiling their information into organized, user-friendly chapters that contain the core principles upon which they base their approach to healing cancer. The practitioners interviewed are medical, osteopathic and naturopathic doctors, trained in a variety of integrative approaches to cancer treatment"--Page 4 of cover.

In 2013, Ann Cameron cured Stage 4 colon cancer without chemotherapy or radiation, by drinking carrot juice. Since then, others with a variety of cancers have reported similar successes. Cameron wanted to find out why such an apparently simple cancer cure--just carrots--works. Based on her extensive reading in scientific journals focused on nutrition and cancer, her ground-breaking book describes the details of the carrot treatment and the scientific evidence for its power. In this book, she shares little-known research that is revolutionizing scientific thinking about cancer and how to treat it. The research comes from the exciting new field of epigenetics--the study of how chemical switching mechanisms in our bodies change the expression of our genes. Our environment, the foods we eat, and the way we live can silence pro-cancer genes or turn them on, set anti-cancer genes on alert or turn them off. Genes aren't our destiny. Neither is cancer. Cancer develops when the body loses its ability to recognize and eliminate rogue cells--cells that take over the body if they don't quit dividing. In some cases--probably many--carrots can restore the body's natural power to regulate growth and kill defective cells. The scientific information in this book could be a life-saver and a beacon of hope for you or someone you know. Equally helpful, it offers the practical knowledge Cameron gained from her journey through cancer and back to health--how to use the internet to research proposed treatments and the quality of hospitals and doctors; how to reduce the cost of cancer care; and how to arrive at individual treatment decisions that are best for you.

Alfredo Bowman, popularly known as Dr. Sebi, is a renowned holistic doctor who cured several terminal diseases with the use of herbs, spices, and a unique vegan diet that reverses all the diseases in the body. Some people suffer from chronic, debilitating disorders for which no conventional treatment brings relief. Can marijuana ease their symptoms? Would it be breaking the law to turn to marijuana as a medication? There are few sources of objective, scientifically sound advice for people in this situation. Most books about marijuana and medicine attempt to promote the views of advocates or opponents. To fill the gap between these extremes, authors Alison Mack and Janet Joy have extracted critical findings from a recent Institute of Medicine study on this important issue, interpreting them for a general audience. Marijuana As Medicine? provides patients--as well as the people who care for them--with a foundation for making decisions about their own health care. This empowering volume examines several key points, including: Whether marijuana can relieve a variety of symptoms, including pain, muscle spasticity, nausea, and appetite loss. The dangers of smoking marijuana, as well as the effects of its active chemical components on the immune system and on psychological health. The potential use of marijuana-based medications on symptoms of AIDS, cancer, multiple sclerosis, and several other specific disorders, in comparison with existing treatments. Marijuana As Medicine? introduces readers to the active compounds in marijuana. These include the principal ingredient in Marinol, a legal medication. The authors also discuss the prospects for developing other drugs derived from marijuana's active ingredients. In addition to providing an up-to-date review of the science behind the medical marijuana debate, Mack and Joy also answer common questions about the legal status of marijuana, explaining the conflict between state and federal law regarding its medical use. Intended primarily as an aid to patients and caregivers, this book objectively presents critical information so that it can be used to make responsible health care decisions. Marijuana As Medicine? will also be a valuable resource for policymakers, health care providers, patient counselors, medical faculty and students--in short, anyone who wants to learn more about this important issue.

A critical resource for anyone with a cancer diagnosis. Written by a radiation oncologist and cancer researcher, *Taking Charge of Cancer* offers an insider's guide to understanding and receiving the best treatment options, choosing the right medical team, and approaching this difficult time with knowledge and hope. Receiving a cancer diagnosis can be terrifying, and the first thing you probably want to know is: How am I going to survive this? Cancer care requires decisions from numerous professionals, delivering treatments that are potentially life-saving, but also potentially dangerous and life-threatening. The chances of cure and survival for any given patient depend on the expertise of the cancer team, and whether procedures are in place to ensure that cancer care is delivered properly. So, how can you make sure you choose the right treatment team and ensure the best chances of survival and long-term health after being diagnosed with cancer? *Taking Charge of Cancer* is a different type of book for cancer patients—one that goes beyond the cancer information that is currently available, allowing you to truly take control of your cancer treatment. You'll learn how to obtain and understand medical records, and why these records are critical to your care. You'll also find the tools you'll need to determine if the recommendations made by doctors are in keeping with accepted treatment guidelines. You'll discover how doctors use evidence to decide which treatments are best, as well as how doctors can become biased in their recommendations. And, most importantly, you'll be able to evaluate whether surgery, radiation, or chemotherapy make the most sense in your specific case—and whether or not these serious treatments are being delivered effectively and safely according to the highest standards. Now that you've received a cancer diagnosis, it's time to set a plan in motion for your recovery. This book will help you do just that—every step of the way.

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb's effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta's family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta's daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn't her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

#1 NEW YORK TIMES BESTSELLER • PULITZER PRIZE FINALIST • This inspiring, exquisitely observed memoir finds hope and beauty in the face of insurmountable odds as an idealistic young neurosurgeon attempts to answer the question What makes a life worth living? NAMED ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • People • NPR • The Washington Post • Slate • Harper's Bazaar • Time Out New York • Publishers Weekly • BookPage Finalist for the PEN Center USA Literary Award in Creative Nonfiction and the Books for a Better Life Award in Inspirational Memoir At the age of thirty-six, on the verge of completing a decade's worth of training as a neurosurgeon, Paul Kalanithi was diagnosed with stage IV lung cancer. One day he was a doctor treating the dying, and the next he was a patient struggling to live. And just like that, the future he and his wife had imagined evaporated. When *Breath Becomes Air* chronicles Kalanithi's transformation from a naïve medical student “possessed,” as he wrote, “by the question of what, given that all organisms die, makes a virtuous and meaningful life” into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. What makes life worth living in the face of death? What do you do when the future, no longer a ladder toward your goals in life, flattens out into a perpetual present? What does it mean to have a child, to nurture a new life as another fades away? These are some of the questions Kalanithi wrestles with in this profoundly

moving, exquisitely observed memoir. Paul Kalanithi died in March 2015, while working on this book, yet his words live on as a guide and a gift to us all. "I began to realize that coming face to face with my own mortality, in a sense, had changed nothing and everything," he wrote. "Seven words from Samuel Beckett began to repeat in my head: 'I can't go on. I'll go on.'" When *Breath Becomes Air* is an unforgettable, life-affirming reflection on the challenge of facing death and on the relationship between doctor and patient, from a brilliant writer who became both. Are you looking for a new way to get healthy? Do you wish there was a way to overcome health problems without the damaging effects of modern medicine? If you answer yes to either of these questions, then Dr. Sebi is who you need. This is the first book in Dr. Sebi's Cure Series. Dr. Sebi was a Honduran herbalist and healer who discovered that a simple diet could be the cure for so many illnesses in the world. Think about the number of auto-immune diseases there are, such as HIV and lupus. Doctors don't know how to heal those diseases. All that is available are medicines to help control them, which is great, but wouldn't it be great if there was something you could do that would get rid of the disease altogether? Dr. Sebi wanted that, and that's what he did. Within these pages, you will learn: How Dr. Sebi's treatment plan can help STDs like herpes and HIV The reason why eliminating mucus can help with diabetes Why hair loss no longer has to be permanent Dr. Sebi's nutritional guide Who Dr. Sebi is and his treatment philosophy ... And much more. Understand that this may seem all too good to be true, or that it's telling you modern medicine is completely bad. You will find that Dr. Sebi never tells you to stop taking medicines prescribe by doctors. Instead, you will use his diet, products, and treatments, along with your doctor's orders to help you heal. Right now, it's up to you to make the final decision. Stay exactly as you are right now. Fed up with how you feel, and unable to do anything about it, or buy this book and make changes your body will love you for.

"I cure cancer," say it, because only you can cure your cancer. Say, "I cure cancer!" How do you cure cancer? Cure your acidosis and kill your pathogens. Dr. Bernardo was treating cancer patients for 50 years with this alkaline balancing protocol with a 90% success rate. This book has his protocol and many experts to back it up. *I Cure Cancer*, debuted in 2006 as a movie in NY. It explains for curing cancer, natural healing is the only way. Go holistic. Get alkaline. You don't die of cancer. You die of Acidosis. My info isn't to replace your Doctors it's to add to your arsenal. I'm just a filmmaker. That being said these days, going to your doctor is not enough due to the fact that the medical business is just that: a business. Therefore, it offers only those treatments that are lucrative for the medical industry. Those treatments have a dismal long-term remission rate, and they are only a tiny slice of what's available for treating cancer and what has worked for other people. Therefore, if you want to make sure you are doing everything you can to cure your cancer, and if you are willing to take responsibility for your own life, you must not only go to your doctor but also do your own research in order to learn about options that could either complement or replace conventional, Western methods (chemotherapy, radiation and surgery). These methods work for some but also have serious and sometimes fatal side effects. I am not a Doctor, nor am I offering a cure to anyone. The "i" in *I Cure Cancer* refers to 'you', the person who is logging on to the site in search of information regarding what other fellow human beings have done in battling this horrendous disease. In short as with any matter of importance dealing with one's well being, the first step is in taking responsibility for one's self. To gather as much information on the subject as possible in order to make educated assessments on what would work best for them. I made the film because as an actor in Hollywood it was the next viable venue for me to express what I had to say as a spirit on this planet. Regular movies weren't cutting it. Reading someone else's lines weren't my thing. I wanted to say my own lines. So I did through other people. I interviewed them to tell my story. In this documentary, it was that cancer was curable if you went holistic. I realized the movie had to be made into a book. I had to show the world what I found and include a basic do it at home holistic health program via Dr. Bernardo Majalca. So here you go. Everything in one book for your cancer healing journey. If you are in a hurry skip to Chapter 6. Read Dr. B's story then do the protocol in chapter 7. It takes 3 months to a year and a half sometimes to get your pH balanced. Once you do, the cancer dies. Bernardo would say if your pH is 7 to 7.4 for 3 months straight you are cancer free. Because cancer can not live in an oxygenated body. Disclaimer: We are not doctors! Just regular people not trusting Rockefeller Western Medicine. Sharing our insights. Only you can cure your cancer so say it. Say *iCureCancer*. I hope this book helps you. I worked hard on it. Good luck and God bless. Peace. Ian Jacklin

The book is based on a therapy used by more than 170 Soviet and Russian medical doctors. According to their clinical observations and hundreds of Western studies, low body oxygenation is the key factor that promotes cancer. These observations resulted in a unique clinical trial on cancer patients organized by one of the Ukrainian physicians who applied the Buteyko method on 120 people with metastatic cancer. The book "Doctors Who Cure Cancer" provides detailed analysis of the method since this is the most successful clinical trial in the whole history of cancer research. The tested cancer therapy was based on breathing retraining or teaching patients who to breathe in accordance with medical norms days and nights. Here are some details of this trial. Early metastatic cancers are deadly, but even these cancers can be cured For early stages of metastasis, the typical 3- or 5-year survival rate is usually about 70-80%. In this astonishing published clinical trial, the survival rate in the control group was about 76%. But 96% of people in the main group, which practiced breathing exercises (to increase body oxygenation), in addition to standard medical therapies, survived. Therefore, this self-oxygenation technique naturally reduced mortality almost 6 times! There were only 2 people in the experimental group who died, but both had serious additional health problems (heart disease and diabetes). But all those who had only cancer survived. This can be the most powerful natural cancer cure used by doctors. Can we cure cancer naturally? The trial was published in *Ukrainian Oncology Journal* (Kiev). This self-oxygenation method has been used by more than 160 Soviet and Russian medical doctors on over 200,000 patients, many of whom had cancers. Prior to this clinical trial, these Soviet and Russian MDs tested hundreds of people with cancers and found that all of them had heavy breathing pattern with low results for the DIY body oxygen test. These doctors discovered that dynamic of cancer (stalemate, metastasis or regression of tumors) depends on breathing patterns and body oxygenation. They developed a program for cancer treatment that is based on simple breathing exercises and lifestyle changes. Breathing parameters in people with cancer Several Western studies (described in this book) measured minute ventilation, respiratory frequency and end-tidal CO₂ in people with cancer. All these medical publications found that virtually each and every person with cancer: breathed about 2 times more air per minute than the medical norm had very low exhaled CO₂ content (about 2 times less for people with metastasis) had increased respiratory rate at rest (up to 30-40 breaths/min instead of normal 10-12 breaths/minute). This is called "hyperventilation" or breathing more than the medical norm. Overbreathing, according to hundreds of clinical studies, reduces O₂ levels in body cells. Review of other breathing therapies for treatment of cancer Apart from the Buteyko breathing method used by more than 150 doctors, this book reviews other self-oxygenation techniques and breathing exercises that increase body oxygenation. The book suggests that people can cure cancer

naturally if they normalize their automatic breathing and achieve about 40 seconds for the simple DIY body oxygen test.

Celery juice is everywhere for a reason: because it's saving lives as it restores people's health one symptom at a time. From celebrities posting about their daily celery juice routines to people from all walks of life sharing pictures and testimonials of their dramatic recovery stories, celery juice is revealing itself to ignite healing when all odds seem against it.
