This probing examination of the period just before and after Hitler came to power corrects many misconceptions about German rearmament. Drawing on previously unexploited sources, Edward Bennett unravels German military plans and shows their implications, undermining the notion that Hitler's accession represented a radical break with Germany's past. He also lays bare the fears and rivalries that hindered the West's response, particularly at the 1932-1933 World Disarmament Conference. Originally published in 1979. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Principles & Practice in EU Sports Law provides an overview of EU Sports Law. In particular it assesses sporting bodies' claims for legal autonomy from the 'ordinary law' of states and international organisations. Sporting bodies insist on using their expertise to create a set of globally applicable rules which should not be deviated from irrespective of the territory on which they are applied. The application of the *lex sportiva*, which refers to the conventions that define a sport's operation, is analysed, as well as how this is used in claims for sporting autonomy. The *lex sportiva* may generate conflicts with a state or international institution such as the European Union, and the motives behind sporting bodies' claims in favour of the *lex sportiva*'s autonomy may be motivated by concern to uphold its integrity or to preserve commercial gain. Stephen Weatherill's text underlines the tense relationship between

lex sportiva and national and regional jurisdictions which is exemplified with specific focus on the EU. The development of EU sports law and its controversies are detailed, reinforced by the example of relevant legal principles in the context of the practice of sports law. The intellectual heart of the text endeavours to make a normative assessment of the strength of claims in favour of sporting autonomy, and the comparison between different jurisdictions and sports is evident. Furthermore the enduring dilemma facing sports lawyers running throughout the text is whether sport should be regarded as special, and in turn how (far) its special character should be granted legal recognition.
